

BAROSSA TRUNK MAIN - BLAKEVIEW

The project involves the undergrounding of 1.5kms of the Barossa Water Trunk Main at Blakeview north of Adelaide.

Key features include:

- The undergrounding of 1.5km of 800mm water trunk main.
- Installation of Anchor and Thrust blocks to secure the main.
- Removal of the existing water Main.
- The existing main provides water to 50,000 houses in the Northern Suburbs.

The project is on schedule has been extended due to variations from United Water associated with issues with design modifications.
