

## BOLIVAR HIGH SALINITY PROJECT

**Description:** To lay approximately 3.5 kilometres of DN 900 mm fully welded MSCL Pipe along the new Port River Expressway.

**Delivery Type:** Construct only

**Role:** Primary Project Management and Quality Control

- Working within the confines of construction of the Port River Expressway.
- Co-ordination of client supplied pipe deliveries in conjunction with 2 other packages let by SA Water concurrent to this contract, so as not to delay construction to any of the 3 contracts.
- Scheduling construction around uncompleted design sections of the Port River Expressway so as not to stop construction

Completed ahead of schedule

Very satisfied with outcome particularly with the co-ordination of the design component with the evolving design of the Port River Expressway.

**Client:**

SA Water

**Project Value:**

\$3.2 Million

**Project Program:**

**Commenced**

June 2003

**Completed**

November 2004

**Referees:**
