

TORRENS ROAD UPGRADE

Reconstruction of Torrens Road between Chief Street and Fitzroy Terrace and Churchill Road between Avenue Road and Torrens Road. Converting part of the existing Torrens Road into a one way service road and part of the existing Churchill Road into a two way service road. The installation of storm water drainage, noise walls, street lighting and landscaping.

Bardavcol was the prime contractor undertaking all earthworks, pavement works and project and construction management. Subcontractors were utilised to undertake drainage work, landscaping, noise wall construction and bitumen sealing.

Key features include:

- Works undertaken under heavy traffic with 2 major intersections and a railway crossing with minimal disruption to traffic.
- Strong community and Council liaison required.
- There were no lost time industrial disputes.
- There were no lost time injuries recorded
