

VICTOR HARBOR INNER RING ROAD

Design & Construction of a new 6km long two lane sealed road to bypass the town centre of Victor Harbor. The project incorporated 4 bridges, 12 road junctions, major culverts, stormwater drainage, public lighting, street furniture and landscaping.

Bardavcol was appointed prime Design & Construction Contractor and engaged Dare Sutton Clarke as Principal Consultants. Bardavcol undertook all earthworks and pavements with it's own plant and labour and utilised specialist subcontractors for various structural components and bituminous sealing.

The District Council of Victor Harbor were very pleased with the delivery method chosen and the completed project

Client

Victor harbor Council

Project Value:

\$10 Million

Project Program:

Commenced

March 2001

Completed

March 2002

Referees:

**Peter Bond
Victor Harbor
Council**

Ph (08) 8551 0500

Key features include:
