

LARGS NORTH MARINA

The construction of a new 180 berth marina to accommodate recreational and commercial vessels. The project also incorporates an industrial estate for marine related activities. The new marina is directly related to changes to the Port Adelaide precinct, associated with the current major redevelopment.

Key features include:

- Excavation and placement of approximately 600,000 tonnes of material
- Piling and pontoons for marina berth
- Large industrial development
- Construction of boat ramps and lift facilities
- Facilities to accommodate special needs groups
- Stringent environmental controls
- Extensive roads and services infrastructure

Client:

Land Management
Corporation
